

About Fantasy Studios

We offer complete recording and production services. Whether it's for music, spoken work, soundtrack, or post production, we offer the top quality facility and service in the San Francisco/ Bay area.

Fantasy Studios is comprised of three historic rooms upgraded to meet the most modern standards including Studio A, which is one of the most requested tracking rooms on the West coast. All rooms are fully equipped with Studer analog as well as ProTools HD. We also offer complete ISDN services linking us to studios worldwide. We have the largest selection of vintage and new microphones and outboard gear in Northern California. All of our rooms are equipped with top quality pianos that record beautifully and have been featured on many famous recordings.

In addition we make our larger rooms available for film, video, photographic shoots, and internet streaming. We have the one of the most comprehensive transfer and editing facilities on the West coast, offering the ability to digitize audio from almost any format in existence.

Fantasy Studios first opened in 1971 as an in-house studio for Fantasy Records and then opened to the public in 1980. Fantasy Studios is a world-renowned facility that has serviced a wide array of companies, artists, films and others and was voted #1 Recording Studio by Billboard Magazine in September, 2000.

We take pride in offering the most professional recording experience in the Northern California. Give us a call and let us help you make your next project the very best that it can be.
